Compressor oils are specially formulated fluids that provide lubrication to the moving metal parts of the air compressor. The type of oil to be used depends upon the demand of the compressor and the gas to be compressed. Compressor oils avail various applications like performance improvement, protective surface film to decrease friction, serves as a sealing fluid, minimizes the deposition of harmful compounds, absorb the heat of compression as direct contact coolant, and others. The use of compressor oils provide different advantages such as high film strength, reduces energy consumption, longer oil life, corrosion resistance, synthetic solvency, and others.
