The global Concrete Bonding Agents market was valued at 2880.38 Million USD in 2021 and will grow with a CAGR of 4.71% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The cementitious latex based concrete bonding agent was the largest bonding agent in 2015 due to the appreciable adhesion it imparts to new concrete when it is adhered to the existing concrete. Cementitious latex based bonding agents are cost-effective and their availability in a variety of formulations drives the demand in the global concrete bonding agents market. Moreover they are highly compatible with concrete admixtures. Repairing is estimated to be the largest application of concrete bonding agents. Exposure to diverse climatic changes and pollution often lead to the early failure in concrete compaction and damage. Thus, timely reparation is imperative to maintain the infrastructure for generations. Concrete bonding agents are extensively used in the repairing application, making it the largest application in the global concrete bonding agents market.
