Abstracts

The global Concrete Dams market was valued at 369.58 Million USD in 2021 and will grow with a CAGR of 2.34% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Concrete Dams market. The key raw materials for concrete dams are concrete itself and steel reinforcement. Design of a concrete dam depends on the purpose of the dam and the configuration of the site where it will be built. The concrete gravity dam has weight as its strength. A cross section of this dam looks like a triangle, and the wide base is about three-fourths of the height of the dam. Water in the reservoir upstream of the dam pushes horizontally against the dam, and the weight of the gravity dam pushes downward to counteract the water pressure. The concrete buttress dam also uses its weight to resist the water force. However, it is narrower and has buttresses at the base or toe of the dam on the downstream side. These buttresses may be narrow walls extending out from the face of the dam, much like the 'flying buttresses' supporting cathedral walls or a single buttress rather like a short dam may be built along the width of the toe of the dam. Nowadays, there are three mainly types of Concrete Dams, including gravity dam, buttress dam and arch dam. And gravity dam is the main type for Concrete Dams, and the gravity dam reached a sales value of approximately 2534.92 M USD in 2017, with 67.08% of global sales value. Concrete Dams technology is not much mature now, and new enterprises can't surpass existing

famous brands on reputation or design in the short term. So, the study group recommends the new entrants need to be considered carefully before enter into this field.
