The global Conducting Polymers market was valued at 4377.57 Million USD in 2021 and will grow with a CAGR of 4.89% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Based on type, the global conducting polymers market has been segmented into electrically conducting and thermally conducting. The thermally conducting segment is projected to grow at a higher CAGR due to increasing miniaturization of electronic components requiring advanced and compact conducting polymers for conduction of heat in confined space. Thermally conducting polymers find major use in LED fixtures, heat sinks, interface materials, radiator end caps, fuel pumps, heat exchangers, medical devices, and instrument housing.
