### Abstracts

The global Cone Crusher market was valued at 1184.02 Million USD in 2021 and will grow with a CAGR of 3.14% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A cone crusher is similar in operation to a gyratory crusher, with less steepness in the crushing chamber and more of a parallel zone between crushing zones. A cone crusher breaks rock by squeezing the rock between an eccentrically gyrating spindle, which is covered by a wear-resistant mantle, and the enclosing concave hopper, covered by a manganese concave or a bowl liner. As rock enters the top of the cone crusher, it becomes wedged and squeezed between the mantle and the bowl liner or concave. Large pieces of ore are broken once, and then fall to a lower position (because they are now smaller) where they are broken again. This process continues until the pieces are small enough to fall through the narrow opening at the bottom of the crusher. In the coming years there is an increasing technology breakthrough for cone crushers in the regions of Europe and USA that is expected to drive the market for more advanced cone crushers. Growth in government budgets in the principal countries, recovery of mining fields, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of cone crushers in developing countries will drive growth in global market. Globally, the cone crushers industry market is low concentrated as the manufacturing technology of cone crushers

is relatively matures than some high-tech equipment. And some enterprises, like Metso, Sandvik, Terex, etc. are well-known for the wonderful performance of their cone crushers and related services. At the same time, Asia-Pacific occupied 60% production market share in 2017, is remarkable in the global cone crushers industry.
