Abstracts

The global Construction Adhesives & Sealants Chemical market was valued at 782.92 Million USD in 2021 and will grow with a CAGR of 8.14% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Adhesive is a chemical mixture, which holds at least two surfaces together to form a single unit. Sealant is a semisolid substance, which is used to fill the space between the two surfaces, thereby providing a barrier or protective coating. Adhesives have high shear and tensile strength and are used for holding and bonding applications. Sealants are preferably used for their ability to fill gaps, and resist relative movement of the substrates. They are more flexible, but have lower strength than adhesives. The global construction adhesives & sealants chemical market is segmented based on adhesive type, sealant type, application, and geography. On the basis of adhesive type, the market is divided into water-based, solvent-based, hot melt, pressure-sensitive, and others (reactive and formaldehyde adhesives). Sealants are classified into acrylic, silicone, polyurethane, butyl, and others (polysulfide, latex, and silyl-modified polymers sealants). Applications covered in the study include residential, commercial, infrastructure, and repair structures.
