Abstracts

The global Construction Films market was valued at 8997.76 Million USD in 2021 and will grow with a CAGR of 2.84% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Based on type, the construction films market has been segmented into LLDPE, LDPE, HDPE, PP/BOPP, PET/BOPET, PA/BOPA, PVB, PVC, and others. The LLDPE type segment is expected to lead the construction films market, in terms of volume and volume, during the forecast period. While LDPE films are losing its market share to its advanced form, that is, LLDPE, owing to the high strength property of LLDPE, which allows down-gauging of films and results in reduced costs. The basic properties of LDPE films can be altered by blending additives or other polymers, such as LLDPE, EVA, black carbon, and color pigments to meet specific applications. LDPE films have a wide application in construction masking concrete structures, foundation lining, vapor barriers, etc.
