## Abstracts

The global Consumer Drone/Unmanned Aerial Vehicle market was valued at 33.92 Million USD in 2021 and will grow with a CAGR of 13.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An Unmanned Aerial Vehicle (UAV), commonly known as a drone, is an aircraft without a human pilot aboard. Consumer drones are enjoyable to fly by yourself or with friends, and within reasonable payload limits, they can also carry cameras, which then would be able to capture beautiful scenery that normally only airplanes or helicopter views can reach. UAVs are a component of an unmanned aircraft system (UAS); which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers.
