## Abstracts

The global Consumer Robotics market was valued at 18506.67 Million USD in 2021 and will grow with a CAGR of 22.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Consumer robotics is shifting from a phase of being largely dominated by cleaning robots, into robotic personal assistants or family companions. Also, robotic toys, which, until now, were largely gimmicky, are transforming into interactive connected play devices that have virtually limitless possibilities, as well as useful educational tools as a part of science, technology, engineering, and math (STEM)-based curriculum. The second phase of the consumer robotics revolution is well and truly underway, and the next 5 years will set the stage for how these robots fundamentally transform our homes and daily lives.
