Abstracts

The global Container Handling Equipment market was valued at 5245.21 Million USD in 2021 and will grow with a CAGR of 2.46% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The diesel based equipment segment is expected to hold the largest market share in 2017 due to the efficient power delivery, low fuel costs, and inadequate/insufficient electric infrastructure at small and medium terminals. Also, the stringent emission regulations for NOx, PM, and CO2 by the US EPA and European Union have prompted equipment manufacturers to offer fuel-efficient equipment with lower emissions. Hence, equipment manufacturers are focusing on the development and sale of electric and hybrid equipment.
