## Abstracts

The global Continuous Screen Changers market was valued at 17.05 Million USD in 2021 and will grow with a CAGR of 4.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A continuous screen changer is a machine that filters out impurities in the polymer extrusion process without interrupting the process when a dirty screen needs to be changed. It's used in melt filtration processes where debris can clog up screens in a very short time and process disruptions are costly. Markets and extrusion processes that employ continuous screen changers include pipe and profile, film and sheet, compounding, resin production, blow molding, nonwovens, and specialty material. The key players are Nordson, Maag, JC Times, Gneuss, Parkinson Technologies, PSI, Erema, HITECH, CROWN, Batte Mechanical, Anji Plastic, Plasmac, Trendelkamp, ECON, Alpha Marathon and so on. In plastics extrusion, having the right screen changer for your material's filtration requirements can make the difference between profit and loss. No process interruption translates into increased production and decreased scrap, bringing maximum efficiency to your extrusion operation. The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Based on regions, the global Continuous Screen Changers market

is segmented into North America, Europe, China, India and the Rest of the World (ROW). Industrialization and business hubs in developing countries continue to increase due to low cost resources. As a result, the demand for Continuous Screen Changers rises as well. Price in US and EU is much higher than that of China and other developing countries due to their high quality and powerful functionalities. Developing countries such as China and India is more likely to attract more investment opportunity for their potential demand. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
