## Abstracts

The global Coolant Flow Control Valves market was valued at 140.41 Million USD in 2021 and will grow with a CAGR of 11.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Coolant Flow Control Valves are needed inside this system for shutting off the coolant flow, switching over coolant circuits and regulating the coolant flow. The valve enables functions for decreasing the engine warm up time through 'engine zero flow', enabling faster cabin warm up by directing the heat to the heat exchanger core and in- or decreasing the coolant flow for an optimized engine temperature. In the global companies that produce the coolant flow control valves, the MSG had the maximum market share with about 13% in 2019. According to regions, Europe dominated the entire market of the coolant flow control valves with about 45% of the global market share in 2019.
