The global Core Materials market was valued at 1312.74 Million USD in 2021 and will grow with a CAGR of 4.74% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The global core materials market for composites is segmented on the basis of type, end-use industry, and region. Based on type, the core materials market for composites has been further segmented into foam, honeycomb, and balsa. Foam is expected to be the fastest-growing type segment of the core materials market for composites. Foam core imparts strength and stiffness while keeping the composite structure lightweight. Rapid growth in the wind energy industry, wind turbine blade manufacturing, and emergence of China and other Asian countries as major wind energy producers are factors fueling the consumption of foam core, thereby driving the core materials market for composites at a significant pace.
