## Abstracts

The global Corporate Clothing market was valued at 5912.21 Million USD in 2021 and will grow with a CAGR of 3.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Corporate Clothing or Uniforms & Workwears is defined as apparel bought by enterprises/institutions which given to their employees to perform their work. Often those employed within trade industries elect to be outfitted in Uniforms & Workwears because it is built to provide durability and safety. At present, the production of corporate clothing is distributed evenly in China, Southeast Asia, South Asia, Southern Europe, Central America and Turkey. China still is the largest production country of corporate clothing in the world in the past few years and it will keep the same position in the next few years. European and American manufacturers mainly manufacture high quality corporate clothing, special protective clothing and fashion clothes. Or some international giants such as VF transfer production bases to the rest of the world. This industry is a labor-intensive industry, and it is difficult for local manufacturers in Europe and the United States to compete with low-priced products.
