Abstracts

The global Corrosion Proof Tape market was valued at 410.7 Million USD in 2021 and will grow with a CAGR of 3.91% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Anti-corrosion tape products mainly include polyethylene anti-corrosion tape, polypropylene fiber anti-corrosion tape, polyethylene 660 anti-corrosion tape, epoxy coal bitumen anti-corrosion cold wrap, among which polyethylene anti-corrosion tape and polypropylene fiber anti-corrosion tape are in chemical infrastructure and pipeline bend. The amount of use in the head anti-corrosion is relatively large. The radiation cross-linked polyethylene heat shrinkable wrap tape is a kind of anti-corrosion tape, and the cross-linked polyethylene has better tensile strength and damage resistance, and the butyl type heat shrinkable sol is used for the glue layer. The peel strength is greatly improved, generally around 70N, which is more than 3 times of cold-wrapped tape, and cold-wrapped tape is above 20N. The anti-corrosion ability is far greater than that of the cold-wrapped tape. It is generally used for the repair of the three-layer polyethylene anti-corrosion structure, the repair of the wound and the corrosion of the opposite-shaped pipe fittings.
