The global Corrugated Box Making Machines market was valued at 4151.73 Million USD in 2021 and will grow with a CAGR of 2.03% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Boxes are used for packaging consumer and industrial goods. Packaging is best suited for shipping and transporting various products that are fragile in nature. These boxes are very durable and have high safety standards compared with the other modes of packaging such as cardboard packaging. Boxes handle pressure and can be stacked for easy and economical transportation. These boxes are safe to use as they do not have any sharp edges.Box packaging are widely used in gift boxes, moon cake boxes, mobile phone box, shoes box, watches, jewelry box, cosmetic box, tea box, wine box, medicine box, etc. A corrugated box making machine is a machine can make box which will provide company with better selection of carton sizes. If they need to make a very small box for tiniest product as well as an extra-large box for a larger item, this machine can handle it. The demand for corrugated boxes in the food and beverage and electronic goods industries is expected to increase during the forecast period because these two industries are the top users of corrugated boxes. Since their invention, corrugated boxes have been mainly used to pack and transport food and beverage products. China and India dominated the corrugated box making machine market in APAC. The demand for corrugated boxes is also expected to increase from other

Southeast Asian countries as these consumable products have not reached the maturity stage. With increasing urbanization and growth of the middle-class population, the demand for various products across different industries is expected to grow during the forecast period. The corrugated box making machine market in EMEA saw a decline in demand for corrugated boxes in the wake of low crude oil prices, which led to the overall economic slowdown in the Middle East region. The slowdown in the oil and gas industry augmented the slowdown in demand for consumer and industrial products, which in turn, hit the packaging industry in this region. Like EMEA, the Americas witnessed a slow growth in the demand for various products and services owing to the economic slowdown. The packaging industry in the US and Canada showed stagnant growth during the corresponding period.
