CPAP, or Continuous Positive Airway Pressure, delivers pressurized ambient air (regular room air) through a delivery system (tubing and mask), thus eliminating apnea events during sleep. CPAP is the most effective treatment for sleep apnea and can potentially improve the patient's sleep overnight; dramatically improving the quality of life for individuals afflicted with obstructive sleep apnea. CPAP devices are frequently used in prehospital and emergency settings. The price of CPAP Devices is slightly decreased in nearly five years. For being accorded with the corresponding application area, the product price has a large differences. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this areas, the future will still have more new investment enter the field. As large demand of CPAP Devices product, the domestic enterprises should hold the opportunity to improve their technology with domestic advantages, such as low raw material price.
