Increasing efforts and funding to raise awareness of cleft and craniofacial disorders is expected to fuel the global cranio maxillofacial fixation devices market. Patients undergo what is often a series of plastic and reconstructive surgeries every year to treat congenital deformities or acquired craniofacial anomalies due to trauma, burns, illnesses or accidents. However, in order to raise awareness of cleft and craniofacial disorders, the various organizations in the world are taking efforts to organize camps and other gatherings. For instance, the American Society of Plastic Surgeons/The Plastic Surgery Foundation, the American Society of Maxillofacial Surgeons. Rapid modernization, use of fast moving vehicles and increasing cases of 'drink and drive' are responsible for the increasing cases of accidents all over the world. These incidences are responsible for the rising patient pool in emergency departments of the hospitals. Most of these accidents are severe that need cranial or facial repair. Apart from accidents, war victims are another group that requires orthopedic prosthetics. These increasing incidents are contributing in the robust growth of the global cranio maxillofacial fixation devices market.
