Abstracts

The global Cristobalite market was valued at 114.72 Million USD in 2021 and will grow with a CAGR of 8.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Cristobalite is a high-temperature polymorph of silica. Since the natural resources of cristobalite are not sufficient for industrial use, it has to be synthesised by the conversion of quartz in a rotary kiln at high temperature (>1500°C) with the assistance of a catalyst. The report only focus on cristobalite used in engineered stone field. Europe is the largest sales place, with a sales market share nearly 56.89% in 2018. Following Europe, Asia Pacific is the second largest sales place with the sales market share of 23.08%. Cristobalite Product market in Asia Pacific region is expected to exhibit the highest growth rate especially in China and Japan. The percentage of Cristobalite used in engineering stone in Asia Pacific is smaller than Europe, so there is a good prospect for development in Asia Pacific.
