The global Cryogenic Pump market was valued at 422.57 Million USD in 2021 and will grow with a CAGR of 2.94% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Positive displacement cryogenic pump is projected to be the highest growing segment on the basis of type of cryogenic pumps from 2016 to 2021. The reason behind the same would be increasing use of positive displacement pumps in end-use industries such as energy and power, shipbuilding, food & beverage, and healthcare, given its compact size. Asia-Pacific is the largest market for positive displacement cryogenic pumps, due to increasing energy demand in the region.
