Abstracts

The global Cycloidal Gear Reducers market was valued at 140.2 Million USD in 2021 and will grow with a CAGR of 3.98% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Compared with common gearboxes and speed reducers, cycloidal style reducers (also known as cycloid drives) cover a broader range of reduction ratios, possess higher load-carrying capacity, are dimensionally smaller and provide smooth, vibration free performance along with high efficiency. These characteristics make them well suited for precision industrial applications, especially in robotics, machine tools and linear axis positioning in assembly & packaging machinery. By region, the Asia-Pacific region has the highest share of income, exceeding 36 percent in 2019.
