The global Data Center Switch market was valued at 1196.11 Million USD in 2021 and will grow with a CAGR of 5.6% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Access switches to account for the largest market share in 2017 mainly due to a wide network connectivity offered by these switches to distribution layers as well as different end users. Access switches need more number of ports to move the data from one network to another so that the load can be balanced. Thus, these switches ensure connectivity between servers and networks. The market for InfiniBand switches is expected to grow at the highest rate during the forecast period. The highest growth of InfiniBand switches is largely because of the high-bandwidth solution for each port under a competitive price that InfiniBand switches offer. In the data center switch market, >1 Gbps to 1 Gbps to
