The global Date Palm market was valued at 125.39 Million USD in 2021 and will grow with a CAGR of 7.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Date palms were one of the few crop plants that could survive desert conditions, and became a reliable source of food in an otherwise inhospitable climate. Sumerian, Babylonian, Egyptian, and other ancient people used the palm for house construction and thatching as well as for food. It was spread across northern Africa along the coast and at oases by nomadic people, where it became a staple crop. Product innovations addressing growing health concerns have changed the market dynamics on a global level. Increasing offerings by vendors using safe and healthy ingredients is responsible for the growing demand for healthy snacks, cookies, bakery, and desserts.
