Abstracts

The global Decorative High-pressure Laminate (HPL) market was valued at 830.75 Million USD in 2021 and will grow with a CAGR of 3.28% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Decorative laminates are laminated products primarily used as furniture surface materials or wall paneling. It can be manufactured as either high- or low-pressure laminate, with the two processes not much different from each other except for the pressure applied in the pressing process. Decorative High-pressure Laminate (HPL) is composed of resin-impregnated Kraft paper, decorative paper face material and a clear melamine-impregnated overlay. These sheets are bonded at pressures greater than 1000 pounds per square inch and temperatures approaching 300 F (149°C). At present, Asia-Pacific is the largest sales area in the world, which occupied about 56.92% in 2017. The following area is Europe. The global leading players in this market are Fletcher Building, Wilsonart, Panoram Industries, Greenlam, EGGER, ASD, Kronospan, Trespa International, PFLEIDERER, Merino, etc. HPL products demand market has a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share, local enterprises export more low-end products over capacity or molding process basic Materials. Although sales of HPL products brought a lot of opportunities, the study group recommends the new entrants just having money but

without technical advantage and downstream support do not enter into the high pressure laminate field.
