### Abstracts

The global Defibrillators market was valued at 1453.87 Million USD in 2021 and will grow with a CAGR of 3.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

On the basis of products, the defibrillators market is classified into implantable cardioverter defibrillators (ICDs) and external defibrillators. The ICDs product segment is bifurcated into transvenous implantable cardioverter defibrillators (T-ICDs) and subcutaneous implantable cardioverter defibrillators (S-ICDs). The T-ICDs segment is further classified into single-chamber ICDs, dual-chamber ICDs, and cardiac resynchronization therapy defibrillators (CRT-Ds). The external defibrillators segment is further classified into manual external defibrillators, automated external defibrillators (AEDs), and wearable cardioverter defibrillators (WCDs). The ICDs segment is expected to account for the largest share of the global market in 2017. Factors such as the development of technologically advanced devices with extended longevity, rapid growth in the number of implant procedures, and increasing adoption of cardiac resynchronization therapy defibrillators (CRT-Ds) and S-ICD systems across the globe are contributing to the large share of this segment.
