Degaussing system is the most effective means of ship`s magnetic protection. The main purpose is to prevent the enemy`s magnetic weapon attack and magnetic detection and improve the vitality of the ship. The ship demagnetization system is mainly composed of three parts: demagnetization winding, demagnetization control equipment and demagnetization power supply. In recent years, regional conflicts still occur constantly and countries attach increasing importance to arms construction. Under such a big trend, the prospect of ship demagnetization equipment industry is bright. Demand is now concentrated in major naval powers such as China, Europe and the United States, where China and India are expected to continue to grow relatively quickly. In the downstream consumer market, demagnetization equipment can be widely used in aircraft carriers, minesweepers, submarines, frigates, minesweepers, submarines and other ships, minesweepers are the largest consumer market, accounting for about 61.86% of the market.
