Denatured alcohol is ethanol (ethyl alcohol) made unfit for human consumption by adding one or more chemicals (denaturants) to it. Denaturing refers to removing a property from the alcohol (being able to drink it), not to chemically altering or decomposing it, so denatured alcohol contains ordinary ethyl alcohol. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Denatured Alcohol industry in larger demand on the market in the past few years, more and more companies enter into Denatured Alcohol industry, the current demand for Denatured Alcohol product is relatively low, lack of demand, excess supply.
