Europe and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 35.36% of the global consumption volume in total. Denim has three types, which include light denim, medium denim and heavy denim. And each type has specific characteristic relatively. With fashion effect of denim, the downstream application industries will need more denim fabrics. So, denim has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce popular and good visual effect denim through improving technology. The major raw materials for denim are cotton, polyester
