The global Dental CBCT market was valued at 68.27 Million USD in 2021 and will grow with a CAGR of 8.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

CBCT is a compact, faster and safer version of the regular CT. Through the use of a cone shaped X-Ray beam, the size of the scanner, radiation dosage and time needed for scanning are all dramatically reduced. A typical CBCT scanner can fit easily into any dental (or otherwise) practice and is easily accessible by patients. The time needed for a full scan is typically under one minute and the radiation dosage is up to a hundred times less than that of a regular CT scanner. North America is the largest consumption market of Dental CBCT, with sales market share nearly 40%. And the production market share of Dental CBCT is 30%. The manufacturers of Dental CBCT in North America have small and medium scale, and the number of them is big. The second place is Europe, following North America with the sales market share of 27% and the production market share over 40%. The first Dental CBCT was born in Europe, and big manufacturers are concentrated in Europe. So there are a large number of Dental CBCTs for export to other regions. Asia is another important market of Dental CBCT, enjoying 25% production market share and 26% sales market share. Main players are from Japan and Korea, like J.Morita and ASAHI from Japan and VATECH from Korea. China also can supply Dental CBCT, but the products are mainly consumed in China.

Market competition is intense. Danaher, Planmeca Group, Sirona, New Tom (Cefla), etc. are the leader of the industry, and hold key technologies and patents, with high-end customers, have been formed in the monopoly position in the industry. However, with further expanding market, there will be more manufactures in the future.
