### Abstracts

The global Deoxyguanosine market was valued at 2.04 Million USD in 2021 and will grow with a CAGR of 2.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Deoxyguanosine is composed of the purine nucleobase guanine linked by its N9 nitrogen to the C1 carbon of deoxyribose. It is similar to guanosine, but with one hydroxyl group removed from the 2' position of the ribose sugar (making it deoxyribose). If a phosphate group is attached at the 5' position, it becomes deoxyguanosine monophosphate. Nantong Qiuzhiyou Bioscience&biotechnology and Hubei Yuancheng Saichuang Technology are the top two of Deoxyguanosine, with about 27% market shares. As for consumption, India is the largest consumer, with above 48% market shares. The whole deoxyguanosine market is small and quietly calm at the moment.
