The global Diamond-Like Carbon Coating market was valued at 152.33 Million USD in 2021 and will grow with a CAGR of 4.45% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Diamond-Like Carbon (DLC) coating is an amorphous, stable carbon layer that does not react to acids or alkaline. It is highly resistant against oxidation and corrosion. The high density and amorphous structure of DLC inhibit corrosive by-products from penetrating into tools. The chemically inert characteristics of diamond-like coatings dramatically reduce possibility of cold welding and material pickup on the surface of the tool. At present, the major manufacturers of diamond-like carbon coating are concentrated in Oerlikon Balzers, IHI Group, CemeCon, Morgan Advanced Materials and Miba Group (Teer Coatings). Asia Pacific is expected to witness fastest growth, especially China at a CAGR of 6.82% from 2011 to 2016. North America and Europe are expected to witness demand growth at a CAGR of 4.30% and 4.74% from 2011 to 2016, respectively. In application, diamond-like carbon coating downstream is wide and recently diamond-like carbon coating has acquired increasing significance in various fields of automotive components, tooling components and others. Globally, the diamond-like carbon coating market is mainly driven by growing demand for automotive components which accounts for nearly 58.87% of total downstream consumption of diamond-like carbon coating in global.
