## Abstracts

The global Dicumyl Peroxide market was valued at 15.77 Million USD in 2021 and will grow with a CAGR of 5.05% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Dicumyl Peroxide market, Dicumyl peroxide is primarily used in the manufacture of polymers and elastomers. Dicumyl peroxide is mainly used as cross-linking agent for polymers and elastomers. Polymers which can be cross-linked with organic peroxides are used to produce hose, wires, tires, rubber seals, etc. Dicumyl peroxide can also be used as flame-retardant synergist in expanded polystyrene (EPS). In that case, the peroxide is incorporated in small quantities in EPS, and will catalyse the flame retardant action in case of heating. For industry structure analysis, the DCP industry is comparatively fragmented by manufacturers, but, it is concentrated by regions. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. Regionally, China is the biggest production area of DCP, about 85% production market share of the global production in 2017, also the leader in the whole DCP industry. For price trend analysis, a key variable in the performance of DCP producers is downstream market demand. Generally, demands in developed countries are moderate, while demands in developing areas are in fast growth. China is the largest consumption region of DCP, reaching 17136 MT in 2017, followed by Europe and USA. For trade analysis, the import and

export business of DCP is frequent, with China the leading exporter. The import business in China is frequent, and local demand of high end products cannot be met with the production. But overcapacity is increasing year by year,
