Diesel Cars used diesel engine which means fuel is mixed with air as it goes into the engine and that mixture is compressed internally, inside the engine's cylinders. At some point, the fuel ignites (combusts), driving a piston down and turning the crankshaft, which is connected to the vehicle's transmission and ultimately turns the wheels. The piston then moves up in the cylinder, pushing the burnt gases out of the engine and out the tailpipe as exhaust. This cycle repeats several times per second. The Diesel Cars market is very concerted market; the revenue of top fifteen manufacturers accounts about 66% of the total revenue in 2017. The high-end products mainly come from USA and Europe. The leading manufactures mainly are Volkswagen, Daimler, BMW, PSA and Renault. Volkswagen is the largest manufacturer; its revenue of global market exceeds 15% in 2017. Geographically, the global Diesel Cars market has been segmented into North America, Europe, China, Japan, Korea, India, Southeast Asia and RoW. The Europe held the largest share in the global market, its revenue of global market exceeds 61% in 2017. The next is China.
