The global Diffractive Elements market was valued at 328.88 Million USD in 2021 and will grow with a CAGR of 4.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Diffractive optical elements, DOEs, were designed for applications with lasers and high-power lasers. Used as multi-spot beam splitters, in beam shaping, and beam profile modification, such elements offer endless possibilities in different application fields. Diffractive optical element uses a thin micro structure pattern to alter the phase of the light propagated through it. When a laser beam is transmitted through a diffractive optical element (DOE), it can be transformed into an almost arbitrary light pattern in the observation plane. Global Diffractive Optical Elements key players are Holo/Or Ltd., HORIBA, Newport Corporation, Jenoptik, Photop Technologies (II-VI Incorporated), Shimadzu Corporation and Zeiss, etc. Global top five players hold a share about 26% in 2019.
