The global Diffractive Optical Elements market was valued at 52.46 Million USD in 2021 and will grow with a CAGR of 4.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Diffractive optical elements, DOEs, were designed for applications with lasers and high-power lasers. Used as multi-spot beam splitters, in beam shaping, and beam profile modification, such elements offer endless possibilities in different application fields. Diffractive optical element uses a thin micro structure pattern to alter the phase of the light propagated through it. When a laser beam is transmitted through a diffractive optical element (DOE), it can be transformed into an almost arbitrary light pattern in the observation plane. USA is the largest consumption regions of Diffractive Optical Element, with a revenue market share nearly 29.73% in 2017. The second place is Europe; following North America with the revenue market share over 26.11% in 2017. Diffractive Optical Element used for Laser Material Processing, Medical and Other. Report data showed that 66.85% of the Diffractive Optical Element market demand for Laser Material Processing in 2017. There are many kinds of Diffractive Optical Element, such as Beam Shaping / Top-Hat, Beam Splitting and Beam Foci. Beam Splitting is important in the Diffractive Optical Element industry, with a revenue market share nearly 56.29% in 2017.
