The global Digital Instrument Cluster market was valued at 1702.81 Million USD in 2021 and will grow with a CAGR of 10.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Digital Instrument Cluster is a set of instrumentation, including the speedometer, that is displayed with a digital readout rather than with the traditional analog gauges. Many refer to it simply as a digital speedometer. The >12 inch digital instrument cluster is estimated to be the fastest growing segment of the digital instrument cluster market, by display size. The growth of >12 inch digital instrument cluster can be attributed to the increasing demand for a bigger display, increasing number of features in a digital instrument cluster, and growing demand for vehicle aesthetics. However, vehicles such as entry-level, mid-segment, and light commercial vehicles are equipped with a 5-8 inch digital instrument cluster that helps to decrease the overall cost of the vehicle.
