Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A digital microscope is a variation of a traditional optical microscope that uses optics and a digital camera to output an image to a monitor, sometimes by means of software running on a computer. A digital microscope often has its own in-built LED light source, and differs from an optical microscope in that there is no provision to observe the sample directly through an eyepiece. Since the image is focussed on the digital circuit the entire system is designed for the monitor image. The optics for the human eye are omitted. Digital Microscope industry has much fragmented, manufacturers are mostly in the Japan. Among them, North America Production value accounted for less than 24.20% % of the total value of global Digital Microscope in 2015. Olympus Corporation is the world leading manufacturer in global Digital Microscope market with the market share of 5.64% in 2015.
