The global Direct Attach Cable market was valued at 1221.51 Million USD in 2021 and will grow with a CAGR of 21.93% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

DAC cables, or ?Direct Attach Cables?, are a form of shielded high speed cable with SFP connectors on either end. They can be used to connect switches to routers and/or servers. The increasing demand for next-generation high speed pluggable-products is boosting the growth of the market over the forecast period. However, the high costs associated with the set-up of optical cable networks, as well as the expensive raw materials used in the manufacture of optical cables, for instance, silica and plastic, are additional factors that hinder the growth of the market.
