Abstracts

The global Direct Methanol Fuel Cell (DMFC) market was valued at 110.15 Million USD in 2021 and will grow with a CAGR of 7.35% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The direct methanol fuel cell (DMFC) is a relatively recent addition to the suite of fuel cell technologies; it was invented and developed in the 1990s by researchers at several institutions in the United States, including NASA and the Jet Propulsion Laboratory. During decades of research, especially around 2010, many high tech companies like NEC, UltraCell they all have dedicated a large mass of R&D source into DMFC, and they all exhibited their prototype of their own DMFC. But as the fact, there are only two companies focus on commercial productions. This report only study the DMFC market will full-time commercial production participants. DMFCs can be seen as one of the most prominent fuel cell technology to be used as a generator and production device in small portable applications due to its high energy storage density fuel, fast refuelling and capability to refuel during operation. The Direct Methanol Fuel Cell (DMFC) is a subset of the Proton Exchange Membrane (PEM) fuel cell technology. PEM fuel cells have a number of features and advantages that ensure their usage in a variety of power applications including portable and transportation systems to large-scale stationary power systems for buildings and distributed generation. The commercialization of DMFC-systems is driven by consumer demands and desires for secure and reliable

power sources that operate alone or as a hybrid energy system combining the fuel cell technology with existing advanced battery technologies.
