Abstracts

The global Disconnect Switch market was valued at 1009.71 Million USD in 2021 and will grow with a CAGR of 2.66% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The demand for electricity is increasing in the developed nations in North America and Europe, as well as in fast-growing economies in Asia-Pacific. Thus, there has also been a consequent rise in the generation, transmission, and distribution of electricity to meet this increased demand. This in turn gives rise to the growth of the markets for the associated components, such as switchgear, circuit breaker, disconnect switch, and so on. The market for disconnect switch is expected to witness significant growth, especially in developing countries, where the transmission and distribution industry is in the growth stage. Disconnect switches are also used in transmission lines, substations, urban transportation, and heavy manufacturing. The increasing transmission and distribution network expenditure, growing infrastructural and industrial developmental activities, and rising safety concerns are some of the key drivers of this market.
