Abstracts

The global Distributed Control System (DCS) market was valued at 2130.66 Million USD in 2021 and will grow with a CAGR of 4.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A distributed control system (DCS), to control distributed processes or manufacturing systems, is a control system for a process or plant, wherein control elements are decentralized and distributed throughout the system. This is in contrast to non-distributed systems, which use a single controller at a central location. In a DCS, a hierarchy of controllers is connected by communications networks for command and monitoring. They offer flexibility, extended equipment life, simplicity of new equipment integration, and centralized maintenance when used in an industrial environment. Downhole drilling tools are collection of tools used in downhole drilling applications. In this report, the statistic data bases on drill bit mainly used in oil field and gas field. Drilling bit could be classified as fixed cutter drill bit, roller cone drill bit and others and mainly be applied in oil field and gas field. At present, oil field application is the main downstream, which occupied 61.92% of market in 2015.
