The global Document Readers market was valued at 2.1 Million USD in 2021 and will grow with a CAGR of 5.16% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact wwhich will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Earth Leakage Protection is used to protect the circuit from overload and short circuit. It is worked in the situation when it is in the event of a leakage fault and a fatal danger of personal electric shock. It can be used to protect overload or short circuit of the line or motor.The key players are 3M (Gemalto), Desko, ARH, Access IS, Regula Baltija, China-Vision, OT-Morpho, Veridos (G&D), Prehkeytec, DILETTA, Grabba, BioID Technologies, Wintone and so on. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas` company prefers investing to underdevelopment regions these years. The leading companies own the advantages on better performance, more abundant product`s types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Looking to the future years, the slow downward price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin. The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Market stays in mature period with a clear

concentration. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Manufacturers can take advantage of this situation by reinforcing their production units and supply-chains to avoid any delay in production turn-around-times (TAT) and supply-lead-times. Significant and lasting barriers make entry into this market difficult. These barriers include, but are not limited to: (i) product development costs; (ii) capital requirements; (iii) intellectual property rights; (iv) regulatory requirement; and (v) Transitions` unfair methods of competition. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive .The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
