Abstracts

The global Dried Fruits market was valued at 6171.14 Million USD in 2021 and will grow with a CAGR of 2.35% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Dried fruit is a processed fruit in which most of the water is removed from fruit either through a natural procedure of sun drying or dehydrators. Both dried and fresh fruits are a rich source of antioxidants and fibers but in dried fruits, a small amount of vitamins is lost during the dehydration process. Dried fruit market is gaining acceptance due to its easy snack to pack feature which avoids spoiling of fruits as quickly as fresh fruits. Furthermore, the market is witnessed to be propelling with its application in different product line.
