The global Dry Ice Pellet Blasting Machine market was valued at 100.59 Million USD in 2021 and will grow with a CAGR of 3.46% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Dry ice blasting is a form of carbon dioxide cleaning, where dry ice, the solid form of carbon dioxide, is accelerated in a pressurized air stream and directed at a surface in order to clean it. Asia Pacific is expected to be the fastest growing market over the forecast period owing to extensive usage in the cleaning, surface preparation and parts finishing. This can primarily be attributed to the considerable Chinese market, which contributes significantly to global volume as well as revenue generation. Although average selling prices are lower in Asia Pacific, high demand is expected to result in sizable market revenue over the next six years.
