Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The Dry Vacuum Pumps (DVP) are used increasingly throughout industry where there is a growing demand for uncontaminated vacuum, free from oil or service liquid, a requirement for low operating pressures, a flexibility required from batch processes, concern about storage and disposal costs of service liquids and the pressure to minimize life-cycle costs. The main advantages of DVP are: Environmentally Conscious, Low Noise, Long Life, Safety Enhanced. In the coming years there is an increasing demand for Dry Vacuum Pumps in the regions of North America, Europe and Asia-Pacific. In the past few years from 2012-2016, the global production and consumption developed stably. The global Dry Vacuum Pumps market size in terms of production is projected to grow to 1114 K Units while revenue 2134 M USD by 2022. At the same time, EU and North America is remarkable in the global Dry Vacuum Pumps industry because of their market share and high performance materials of Dry Vacuum Pumps. In the future, the production and consumption is estimated to continue developing with a stable growth rate. To meet the large and increasing demand, more and more manufacturers will go into this industry for low entrance barrier. The price of Dry Vacuum Pumps differs from company to company, as there is a great difference of Dry

Vacuum Pumps quality among different companies.
