The global Ductile Cast Iron market was valued at 2957.4 Million USD in 2021 and will grow with a CAGR of 2.05% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Ductile iron, also known as ductile cast iron, nodular cast iron, spheroidal graphite iron, spheroidal graphite cast iron and SG iron, is a type of graphite-rich cast iron discovered in 1943 by Keith Millis. While most varieties of cast iron are weak in tension and brittle, ductile iron has much more impact and fatigue resistance, due to its nodular graphite inclusions. Global market for Ductile Cast Iron is driven by growing manufacturing activity, particularly rising automobile parts production in developing markets. Growth in the market is driven by regional powerhouses, China and India, which continue to witness steady increases in outsourced manufacturing activity.
