Fiber laser light is created by banks of diodes. The light is channeled and amplified through fiber optic cable similar to that used for data transfer. The amplified light, on exiting the fiber cable, is collimated or straightened and then focused by a lens onto the material to be cut. Europe has the largest global export quantity and manufacturers in Earth Leakage Protection market, while the China is the second sales volume market for Earth Leakage Protection in 2016. In the industry, Schneider Electric profits most in 2016 and recent years, while ABB and Eaton ranked 2 and 3. The market share of them is 10.83%, 8.59% and 8.10% in 2016. The gap of market share is keep on enlarged due to different strategy. Nowadays, there are three mainly types of Earth Leakage Protection, including 1P, 2P and 3P. And 2P is the main type for Earth Leakage Protection, and the 2P reached a sales volume of approximately 1039.62 M Pcs in 2016, with 39.25% of global sales volume. Earth Leakage Protection technology is much mature now, and new enterprises can not surpass existing famous brands on reputation or design in the short term. So, the study recommends the new entrants need to be considered carefully before enter into this field.
