The global EAS Antennas market was valued at 332.83 Million USD in 2021 and will grow with a CAGR of 2.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An electronic article surveillance (EAS) system is an anti-theft technology that prevents employee theft and shoplifting from retail stores and shops. Small security tags, which are applied to high-value merchandise, warn retailers when shoplifters try to take items through EAS antennas at exit doors. EAS systems provide good security against casual theft. Shoplifters are not familiar with these systems and their mechanisms. Retailers highly prefer security systems such as electronic article surveillance (EAS) antennas to prevent shoplifting and enhance their operational efficiency. It has been observed that retailers such as Walmart Stores, TESCO, Target, and Home Depot are focusing on reducing the retail shrinkage by investing heavily in EAS antennas. The installation of these systems will continue to increase during the projected period because they improve the inventory management and enhance the shopping experience for customers.
