Electrocardiograph (ECG) is a non-invasive medical test that records the electrical activity of the heartbeat over a period of time. ECG monitoring devices such as, resting ECG, stress ECG, and holter monitors help identify and provide information about abnormal functioning of the heart. Cardiovascular disease is one of the most common health problems faced by people across the globe, with high mortality rate accounting for approximately 370,000 people deaths annually in the U.S. alone. This propels the demand for ECG market as the increase in number of ECG tests are conducted by people, susceptible to heart diseases.
