The global Economizer market was valued at 7685.38 Million USD in 2021 and will grow with a CAGR of 3.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The increasing demand for economizers across the globe can be attributed to the growing use of economizers for different applications in commercial and industrial sectors. Moreover, countries such as the US, Denmark, Canada, Sweden, and Poland are investing in clean energy resources to meet the increasing demand for energy, thereby influencing the growth of the economizer market. Based on type, the economizer market has been segmented into fluid economizers and air-side economizers. Fluid economizers use chilled water to provide cooling requirements for waste heat recovery systems. There are 2 types of fluid economizers, namely, fluid economizers for chilled water systems and fluid economizers for glycol DX systems. The fluid economizers segment is the largest and the fastest-growing type segment of the economizer market, owing to their increasing applicability in industrial boilers and HVAC systems.
